product summary

Octabins are a heavy-duty packaging solution for the transportation and storage of bulk cargo such as granular, power and other loose fill products.

- Made from heavy-duty corrugated board, the octagonal shaped pack consists of a base, sleeve and lid, which can be manually erected.
- Octabins provide a cost effective and environmentally friendly alternative to wooden and metal crates.
- The heavy-duty but lightweight material decreases the weight of the load, reducing shipping costs and carbon emissions.
- All octabins are designed to withstand the entire supply chain and are stackable. Optional features such as discharge points are available and, for extreme loads, an inner sleeve can be added to provide the highest bulk resistance.
- To maximize storage space and minimize transport costs all octabins are delivered flat. After use the octabin can be easily disposed of and are 100% recyclable.

executive summary

Octabinz is an industry specialized Octabin manufacturing and trading company. It's production and administration is located in Karachi, Pakistan with an aim to establish local offices in some of the major cities and cater a wide market of the world.

management team

The management team responsible for the product has experience in the relative field of the corrugation and packaging industry with an aim now to solely manufacture corrugated octabins and increase its quality and potential in this growing market. The company also believes in the evolving weather conditions and wants to play its role in protecting the environment by practicing necessary practices to stay environment friendly. For this purpose, manufacturing a product that is 100% recyclable was a mandatory practice for the company.

product types

IRREGULAR RIGID OCTABINS:

The panel dimensions can differ:

4 + 2 + 2 equal panels

Please take into account that after filling the long panels will bulge.

During stacking the octabin sleeve will bear up to the total weight of the octabin that is stacked on top.

If the octabin is not completely filled problems can occur.

The headroom will decrease the stacking strength of the octabin due to fact that the octabin panels are not fully filled by the content.

REGULAR RIGID OCTABINS:

This construction has eight equal panels

During stacking the octabin sleeve will bear up to the total weight of the octabin that is stacked on top

If the octabin is not completely filled, problems can occur.

The headroom will decrease the stacking strength of the octabin due to the fact that the octabin panels are not fully filled by the content

TELESCOPIC OCTABIN

Octabin design for packing different product densities

This construction consists of 2 combined sleeves

The telescopic sleeve is mounted on the main sleeve

The telescopic sleeve will slip downwards during stacking until the product level is reached

The product will bear the weight of the octabin stacked on top

No headroom: higher safety level

Octabins can be printed to your specific requirements, presenting a professional image.

benefits

COST EFFECTIVE

Octabins provide a cost effective and environmentally friendly alternative to wooden and metal crates

INNOVATIVE DESIGN

The heavy-duty but lightweight material decreases the weight of the load, reducing shipping costs and carbon emissions

100% RECYCLEABLE

After use the octabin can be easily disposed of and are 100% recyclable

All octabins are designed to withstand the entire supply chain and are stackable. Optional features such as discharge points are available and, for extreme loads, an inner sleeve can be added to provide the highest bulk resistance.

To maximize storage space and minimize transport costs all octabins can be delivered flat.

After use the octabin can be easily disposed of and are 100% recyclable.

our facility

Our manufacturing facility is located in the industrial hub of Karachi, Pakistan which includes state of the art machinery and capable labor and engineers working round the clock for quality assurance.

Due to the unique design and shape of the octabin, constant human involvement is a key factor to ensure the quality of the boxes. This gives us a competitive advantage over other manufacturing facilities in the rest of the world due to the cost-effective labor in Pakistan

industries we serve

Plastic Bottle Pre-forms

Powders

Foods and fruit industry

Granular

Flaked products

Tobacco

Our Octabin styles are designed to serve to its maximum potential for shipment and storage.
